

LIBERTY
SAFE

LIBERTYSAFE.COM

ALWAYS 
PROTECTED

WHAT SETS LIBERTY APART FROM THE COMPETITION?

1. HIGHLY SPECIALIZED TECHNOLOGY

Our engineers love coming up with new technology, like our roll-form process that lets us bend a single piece of steel to shape the top, bottom, and sides of our safes. This requires fewer welds, and fewer welds means a stronger safe. Or our exclusive, ultra-strong locking bars, which have virtually eliminated pry attacks.

3. INDUSTRY-LEADING FIRE PROTECTION

Our certified fire testing leads the industry. We've furnace tested over 200 safes to make sure they'll meet the level of fire protection we promise. No other manufacturer subjects their safes to the number of actual fire tests that we do. That's why our safes have survived more fires than any other brand.

2. AN UNBEATABLE LIFETIME WARRANTY

If your safe is damaged by a fire or attempted break-in, we'll repair or replace it. This is fairly common in the safe industry, so what makes our warranty unbeatable? For one, it's transferable. For another, if we need to replace your safe, we don't make you pay return shipping on the damaged one, or shipping on the new one. We cover it all: the cost for the new safe, shipping AND installation, and even removal of your old safe. You'll have nothing to worry about.

4. EXCEPTIONAL CUSTOMER SERVICE

We want to make sure you're always protected, AND always taken care of. That's why we employ an expert team of customer service specialists. They're located at our factory in Payson, Utah. And several of them have actually worked on our production floor, building our safes from the ground up. Their product knowledge is unmatched, and they'll take great care of you if you ever need them.

RUGGED DURABILITY • NEXT-GENERATION SAFE TECHNOLOGY • AMERICAN-MADE DEPENDABILITY

LIBERTY SAFE'S SECURITY LEVELS

OUR SECURITY LEVELS ARE BASED ON 6 FEATURES:

- SAFE BODY STEEL THICKNESS:** Our full-sized safes range from ultra-thick, 7-gauge steel to thinner 14-gauge steel
- CERTIFICATION:** Gold-standard UL listing (Underwriters Laboratories is a third-party certification company that verifies the performance and durability of many products), or California DOJ approved
- DOOR TYPE:** Composite, plate, hybrid, or Tough Door with inner steel plate
- LOCKING MECHANISM TYPE:** We offer multiple mechanisms to keep your safe locked up tight
- LOCKING BAR THICKNESS:** Our signature, patent-pending, 4"-wide locking bars range from ½" thick to ¾" thick
- LOCK GUARD TYPE:** Our lock guard options include ball-bearing in our premium safes, triple hardplate for our mid-range safes, and single hardplate for our entry-level safes

THIS GRAPH SHOWS THE BREAKDOWN FOR OUR SAFE LINEUP.

SHOP ONLINE: LibertySafe.com/CompactVault

HDX MODELS – 5 YEAR WARRANTY

HDX-150
SMART VAULT

With Liberty's 5th-generation biometric finger swipe technology, you can access your handgun or other valuables in under 2 seconds. Comes with key backup, interior lights and cable lock.

HDX-250
SMART VAULT

Our larger HDX-250 auto opens in the front. It can easily be placed under your bed, in your closet, or in a drawer, and it can be bolted down for increased security. It comes with an AC adapter.

HDX-350
SMART VAULT

Liberty's HDX-350 is the finest Compact Vault in the industry. It includes multi-directional finger swipe technology, soft-landing door, AC adapter, multiple USB charging ports, slide-out drawer, and lighted interior.

HD MODELS – 2 YEAR WARRANTY

HD-200 QUICK VAULT

The HD-200 has been designed with an auto-opening angled front door to provide great visibility and easy access to your firearm or valuables. Liberty engineers added multiple tamper-resistant designs to resist prying. 9v battery and key back included. 2-year warranty.

HD-300 QUICK VAULT

Liberty's HD-300 has all of the same features as the HD-200 but is 50% larger. It has the same angled front door for greater visibility. An extra interior shelf adds to the HD-300 storage capacity. Mounting holes are included for securing vault to floor or furniture. Foam lined and includes key back-up.

HD-50 KEY VAULT

Liberty's most compact and affordable handgun vault with top-opening access. Foam lined to protect handguns or other valuables. Includes two cylinder keys and security cable for tie down capability!

HD-90 KEY VAULT

Economically priced and conveniently portable, the HD-90 Key Vault is one tough vault that you can take it on the go, and with its low-profile 2.5" height it even fits under automobile seats. Foam lined to protect guns. Two access keys and cable lock included.

HD-100 QUICK VAULT

Liberty's HD-100 is the first in its Quick Combo Series that includes a touch pad with back up key access. Easy press buttons with piston-assisted top-opening door for quick access. Interior light, foam lined, 9v battery, and cable lock included.

ACCESSORIES

AC ADAPTER

Power your HDX-150 with AC for quicker access to valuables. 12592

DC ADAPTER

Power your Compact Vault in your vehicle! Compatible with the HDX-150, 250, 350. 14989

MOUNTING BRACKET

Secure your vault to solid surfaces for extra security. Works with HDX-250 and 350, HD-200 & 300. 12591
